

Waypoint Global Suite

SPC Administrator Virtual Classroom

Course Mission:

The mission of Waypoint Global's SPC Administrator course is to provide the student with the developmental tools and concepts needed to configure the structure of the Waypoint Global Suite SPC product. This class will cover SPC administration, product configuration, adding users and user groups, assigning SPC system privileges, and creating alarm groups.

Prerequisites:

You should have the following skills and/or knowledge: Basic to advanced knowledge of statistical process control concepts and techniques, Keyboard skills and basic Microsoft Windows™ experience.

Audience:

This course is designed for personnel responsible for the design and day-to-day operations of the SPC software.

Format:

Virtual classroom training via GoToMeeting

Topics Covered:

- Overview of analyzing a process
- Configure Users and Groups in Waypoint Global Suite Desktop
- Assign SPC-related privileges to users and user groups
- Configure products for data collection:
 - Configure Products (part name/part number)
 - Configure Processes and process traceability
 - Configure Locations and location traceability
 - Configure Characteristic groups and Characteristics (variable and attribute)
 - Establishing specification limits, control limits, and reasonable limits on characteristics
 - Selecting the statistical technique to be applied to the data
- Product configuration check-in, routing, and/or approval
- Copying existing product configurations to make new ones
- Deleting product configurations
- Configure and use Alarm groups

Course Length:

Two classes
3 hours each

Cost:

\$450 USD per person
